

ΕΝΔΕΙΚΤΙΚΑ ΑΠΟΤΕΛΕΣΜΑΤΑ ΑΠΟ ΤΗΝ ΕΚΤΕΛΕΣΗ ΤΩΝ ΔΙΑΔΙΚΑΣΙΩΝ

The screenshot shows a SQL script in a code editor and its execution in DBeaver. The script creates two views: 'Salarystatus' and 'Salarystatus_for_Didaktikos'. The first view filters for 'Dioikitikos' and 'Didaktikos' staff types. The second view filters for 'Didaktikos' staff type. The DBeaver interface shows the script being executed, and the results of the first view are displayed in a table.

SQL Script:
